

To Ram Air Engineering:

I want to take this time to thank Ram air for there outstanding work performed here at the Sheraton Universal Hotel, with a new physical plant upgrade, replacement of 2 375 ton chillers rebuilt of chilled water and condenser pumps and motors, rebuilt of 2 cooling towers new controls package upgrade of EMS system, when we started the upgrade the mechanical engineer designed the system which had several problems but with the help of Ram Air the system was redesigned and was installed with a turn key operation with no problems thanks again to Ram Air with a complete system upgrade we are saving numerous dollars on energy savings and on every day with other in house mechanical systems I can always depend on Ram for a quick response. I have been using Ram Air for several years and I can say I am very happy with the results of our new physical plant and so are the owners , I feel if we have a mechanical breakdown I know I only need to make one phone call and the problem will be resolved. Thanks again for all your help.
